

Microsoft Edge for Business: The secure enterprise browser optimized for AI

Where work happens, risk follows—making browser security a top priority

of security leaders say that **data protection is their biggest concern**¹

of organizations experienced **at least one data security incident**¹

of global knowledge workers are **already using AI at work**²

Microsoft named a leader in the IDC MarketScape:
Worldwide Application Streaming and Enterprise Browsers 2025 Vendor Assessment

Edge for Business enables Zero Trust browsing

Organization needs:

Edge for Business delivers:

Enterprise-grade security

Natively integrated with Microsoft security. A simple sign-in with an Entra ID unlocks this advanced security. No extensions needed.

Seamless experience

Easy management for admins with no deployment required and familiar management tools. The browser trusted and known by your workforce.

Protect any device, anywhere

Security that flexes with your workforce. Managed or personal, full-time or temp—access is fast, secure, and seamless.

Generative AI controls

Manage unauthorized AI use, including consumer AI apps. Protections extend at the app level through to inline prompt protections.

No additional cost

Extend the value of your existing Microsoft security investments into Edge for Business. No need to pay twice for a secure enterprise browser.
