

Edge for Business: Enterprise-ready AI, safe from day 1

Accelerate productivity without compromising security, compliance, or IT control

AI in everyday
workflows with
Microsoft 365 Copilot

Microsoft Graph and
web intelligence surfaces
what matters most

An industry-leading
secure enterprise
browser foundation

Adopt it at your
organization's pace—
it's ready from day 1

Advanced AI makes the browser an intelligent partner

Browse with Copilot

Agentic browsing that executes multi-step workflows on behalf of the user.

Limited preview available

Copilot-inspired new tab page

Combined search and chat, plus quick access to files, calendar, and personalized prompts.

Generally available

Daily Briefing

A curated summary of priorities across meetings, tasks, and tabs.

Coming soon

Plus, smarter everyday browsing with **multi-tab reasoning** and **YouTube summarization**, with browser history coming soon.

System of safety from day 1

Agentic safeguards

- IT designates allowed sites
- No access to stored credentials, payment methods
- Pauses on sensitive actions for user input

Configurable AI features

- Single toggle activates all everyday AI features
- Individual toggles for advanced AI features

Enterprise data protection

- Prompts, responses, files stay within tenant boundaries
- Microsoft solely a data processor

Secure browser foundation

- Data protections (like DLP) enforced in AI experiences
